

## Best Performing Cards Criteria

The Best Performing Cards tracks and analyzes cards of various sets that were used in professional events throughout MTG's history. While this is in no way a perfect system by any means of ranking cards, this is a different way to examine cards to see how much play and success cards had overall. The cards of this section will only reflect cards that were in the Main Board of decks, no matter if they had 1 or 4 copies, and we will only analyze 5 Constructed Formats.

The MTG Top 8 Website was used to score the cards of the sets. The Scoring System of the Best Performing Cards go as such:

- Cards had to be in decks that achieved Top 8 status in a professional event.
- Cards are awarded 1 point if they were part of a Top 8 Standard Deck, 2 points if they were part of a Top 8 Extended or Modern Deck, and 3 points if they were part of a Top 8 Legacy or Vintage Deck.

This will be an evolving list that will change and expand whenever time is made available. I hope this sparks your curiosity and hopefully you enjoy this content.
